SUMMARY

Computer Science undergraduate building practical AI and software solutions with Python, backend APIs, LLMs, and RAG. Interested in Forward Deployed Engineering, rapid prototyping, integrations, and solving real-world problems through technology.

EDUCATION

Shri Ramswaroop Memorial College of Engineering and Management

B.Tech in Computer Science and Engineering

Lucknow, India

Sept 2023 – May 2027 (Expected)

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, SQL
- **Backend & Web:** FastAPI, REST APIs, OpenAPI/Swagger, Jinja2, HTML, CSS
- **AI/ML:** LLM APIs, RAG, AI Agents, Machine Learning
- **Databases & Tools:** MySQL, SQLite, FAISS, Git, GitHub, Jira

EXPERIENCE

SRDT Training Program (College Organized)

AI/ML Intern

- Applied machine learning to retail analytics problems including customer segmentation, churn prediction, recommendation systems, and demand forecasting.
- Built data workflows covering preprocessing, feature preparation, model development, and inference across multiple business use cases.

SRDT Training Program (College Organized)

Python Full-Stack Intern

- Built **3 database-driven web applications** using Python, Flask, and MySQL, including a Student Management System.
- Implemented CRUD workflows, relational database schemas, form handling, and server-side application logic for end-to-end web applications.

PROJECTS

Knowfforge – AI Knowledge Base Generator

github.com/Elvis280/doc-analysis

- Built a **FastAPI and Python** pipeline that converts PDF documents into structured, source-faithful Markdown knowledge units for downstream RAG applications.
- Implemented document extraction, semantic organization, metadata handling, validation, and LLM-assisted classification to preserve useful context before chunking, embedding, and retrieval.

Nexa – AI Agent System

github.com/Elvis280/NEXA_AI

- Built a Python AI agent that combines LLM reasoning with modular workflows, session memory, multi-turn conversations, and external API integrations for task execution.
- Developed reusable tool-execution components and a FastAPI backend, allowing new capabilities and integrations to be added without changing the core interaction flow.

Campus Saathi – RAG Document Assistant

campussathi.vercel.app

- Built a document Q&A assistant for campus circulars using document processing, semantic search, FAISS, and LLMs to retrieve relevant information from source documents.
- Developed backend APIs for document upload, processing, indexing, retrieval, and question answering, with responses grounded in retrieved document content.

LEADERSHIP

AlgoZenith Student Chapter, SRMCEM

Aug 2025 – Aug 2026

Technical Lead

- Led **8+ coding events and DSA sessions** for **50+ students**, while mentoring **20+** in competitive programming and interview preparation.

GeeksforGeeks Student Chapter, SRMCEM

Oct 2024 – Aug 2026

Faculty Connect & PR Lead

- Coordinated faculty and organizer outreach for **9+ technical events**, including contests, seminars, and workshops.

CERTIFICATIONS & ACHIEVEMENTS

- **Oracle Certified Foundations Associate – Agentic AI** – Oracle University
- **5-Day AI Agents Intensive Course** – Google
- **Model Context Protocol: Advanced Topics** – Anthropic
- **Semrush SEO Crash Course with Brian Dean** – Semrush Academy
- **Smart India Hackathon (SIH) 2025** – Qualified
- **HackerRank: 5-Star Python**
